

Summary:

Haigh-Farr is a premier antenna design, manufacturing and test house developing products used across all platforms in the aerospace industry including missions to Mars, the International Space Station and products fielded to the U.S. Military supporting the warfighter. In our over 50-year history we have enjoyed steady, planned growth. In 2020, Haigh-Farr plans to further grow our team and capabilities to meet increasing demand and to expand into new markets and antenna technologies.

Haigh-Farr is seeking an experienced R&D Machinist with a strong commitment to achieving quality work on scheduled timelines. The ideal candidate will maintain a high level of expertise and professionalism when working closely with others within the department and company to understand requirements and meet customer expectations.

Responsibilities:

- Vertical machining low volume, high precision parts with close tolerances.
- Manual machining both hard and soft materials as well as odd shaped parts.
- Working with both manual Bridge ports and CNC machine operations.

Knowledge & Skills:

- Experience in a tool and die environment a must.
- Experience in working from prints required.
- Strong math skills and excellent mechanical aptitude desired.
- Strong hand eye coordination and manual dexterity.
- Likes to work in a variety of different work stations as production needs require.
- Strong commitment to achieving quality work.
- Team player who will pitch in where needed to get the job done.
- Meticulous record keeping with good computer skills.

Qualifications:

- Minimum High School Diploma or GED, higher education a plus

- 5+ years Machinist experience
- U.S. citizenship required, with ability to possess a security clearance
